

Section 3

1. What are the opposing arguments for not purchasing his own genes?

2) Why is purchasing your own genes a luxury? *By: DESTINA ;)*

3) What is the frontal cortex and what takes place there?

Mar 2-11:05 AM

Section 3

4) What are the pros & cons of purchasing ones genes?

5) Do hyenas interact just by instinct?

6) What are the cons of eliminating malaria? What information can we find to ~~disprove~~ disprove the article and smart article.

Mar 2-11:06 AM

Section 5

What allowed the hyenas' brain to develop as it did? *BT*

How did the env. affect the dev. of social complexity within these animals, and how in that he associated with humans impact on the env.? *JLO*

How was smallpox eradicated? *BT*

Would similar in aquatic animals in large packs? Would they too gain Y. C. larger frontal cortexes.

Have hyenas impacted the environment just like humans have? *JLO*

What were the results of the box and meat experiment? *LB*

Is/how is it possible to produce/create hypotheses of genomes? *BT*

- Do humans and hyenas have a common ancestor? *MA*

With the constant doubt, can the efforts in getting rid of malaria exist? *MCP*

What percent of the brain do hyenas use? *JT*

Mar 2-12:09 PM

Section 1

How has hyenas evolved throughout the years? *RA*

What species other than primates share similarities with the humans brain? *CA*

How much impact does the environment have on humans? *ATFB*

How is the human brain similar to a hyenas brain? *VS*

Does malaria provide the environment w/ anything positive? *Joda, RA*

Mar 2-1:13 PM

Section 1

If a hyena is anti-social does that mean that it's not smart? *Genesis Luciano*

What would be the effect/outcome of having a primate and a hyena interact? - *Des.*

How often does a hyena join a group because of an enemy? *J.A.*

Is it possible for a hyena to have frontal cortex activity while thinking of another hyena? *L.R*

Mar 2-2:09 PM
