

Section 5 3/10/08

$H \rightarrow E$ 4 $E \rightarrow H$ 4

Have control over Env.
Do what's best for us

Δ accidentally + Purposely
↳ cannot balance on its own
our effects cause Env. to have an effect on us.
our actions don't just affect humans... other sp. may suffer
Faster \therefore more critical
We do more to it than it does to us

Constantly helps us
Reasons to imp. Tech
Env. will survive w/o us
Uniformitarianism
↳ Happens Now happened before
Unpredictable
Constant Rebound \rightarrow succession
↳ response to human actions

$E \rightarrow H$ 6 $H \rightarrow E$ 8

Env. will survive w/o us
we can't survive w/o it
Focus us to adapt
↳ Nat. Sel.
Env. factors influence key decisions
We respond to Env. Δ

Humans cause obvious Δ in env.
Cause destruction when we use resource
Work to improve
↳ may cause other probs
Conservation/Preservation
↳ save end sp.
Resource Depletion
Genetic Mod.
↳ control over Natural World

Section 3 3/10/08

13 $H \rightarrow E$ $E \rightarrow H$ 3

Power to Δ
↳ technology

Humans consume resources
Human activities (farming) disrupt Env. systems
Preserve/conserve
↳ sp.
↳ habitats

Cannot change how env. effects us.
Env. dictates key decisions
↳ where to live
↳ what to grow
Natural Disasters
↳ kill ppl
↳ disrupt econ.
Unpredictable

Section 2 3/10/08

9 $H \rightarrow E$ $E \rightarrow H$ 3

We Δ env. more
Power to relocate sp.
↳ change local system
Prevent succession
Try to help but cause more problems
Tech backfires
Everyday activities have effect
Need to produce food causing change

Env. dictates key decisions
↳ where to live
↳ what to grow
Unpredictable - Uncontrollable
Climate Δ \rightarrow Nat. Dis.
The Env. will survive w/o us
We can't survive w/o it
Resource Consumption

Section 1 3/10/08

6 $H \rightarrow E$ $E \rightarrow H$ 5

Daily life activities has great effect
Progress (tech) causes Dry
↳ we are addicted to this

Env. controls decisions
↳ what to grow
↳ where to live
Weather
Succession

The env. will survive w/o us
we will not survive w/o env.
